

PURE CORRUPTION

EMMA, a brilliant post-graduate chemistry student, arrives home from work to the house she shares with three others, to find it ransacked and her roommate, Storm, brutally murdered in his room. Emma is working with her esteemed professor, Dr. Richards, on a top-secret project.

While developing a Parkinson's trauma drug, they accidentally invent a new hallucinogenic that is completely undetectable in standard tests. It can only be described as a Pure form of Ecstasy. Eager to test their creation, Emma (against Dr. Richards' advice) has shared the drug on her unsuspecting roommates, Storm, Sarah and Alex.

Storm's corpse, a bag of money and evidence all pointing in the wrong direction send Emma and her two-remaining room mates on the run. It's a three-way chase as they are pursued by a drug gang of thugs, as well as the police, who are after them for the murder of Storm. Dr. Richards, fearing the consequences of his invention falling into the wrong hands, also joins the chase to retrieve the formula and salvage his reputation.
